

# Performing a keyword search

In previous versions of electronic manuals, searches were limited to one manual at a time. In this new manual pack CD, however, it is possible to select the scope of the search. In other words you can set the scope to meet your needs, such as "Search manuals related to the selected robot series," "Search all manuals related to the horizontal (vertical) articulated robot series" and "Search all manuals included on the manual pack CD."

(1) Click on **Keyword**.

(2) Select the scope of the search.

If the search to be performed is going to be "Search all manuals included on the manual pack CD," for example, click on **Owner's Manuals**.

If it is going to be "Search manuals related to the horizontal articulated robot series," for example, click on **H\*-D/-E**.

If it is going to be "Search manuals related to the selected robot series," for example, click on **HS-E**.

In this example, click on **Owner's Manuals**.

(3) Type the keyword for the search. This time, type "teaching."

If, for example, it is going to be an AND search and you want to include "teaching" and "connections," enter the two words separated by a space.

It is also possible to use wildcards. If you type "\*pendant," for example, both mini pendant and teaching pendant will be included in the search.

(4) Click on the **Search** button or press the Enter key.

All hit words will display, followed by titles, pages, and file names that contain those hit words.

If there are so many hit words that do not fit inside the current search window, click on the separator bar. The search window will be enlarged to its maximum size. (You may drag the separator bar to adjust the search window to the desired size.)

Scroll bar

Clicking the separator bar again will return the enlarged window to its previous size.

You may also scroll through all hit words with the vertical scroll bar.

(5) Select the item you want to view and click on the **Go** button or double-click on the highlighted line itself.

The page containing the specified keyword is opened.

# Using the Index

In previous versions of electronic manuals, the index was simply a list of the vocabulary found in the manual which was attached to the end. In this new manual pack CD, the index can be included as the scope of the search in the same way as a keyword. You can select the type of index to be viewed to meet your needs, such as "Indexes of manuals related to the selected robot series," "Indexes of all manuals related to the horizontal (vertical) articulated robot series" and "Indexes of all manuals included on the manual pack CD."

(1) Click on **Index**.

(2) Select the type of the index(es).

If you want to view "Indexes of all manuals included on the manual pack CD," for example, click on **Owner's Manuals**.

If you want to view "Indexes of manuals related to the horizontal articulated robot series," for example, click on **H\*-D/-E**.

If you want to view "Indexes of manuals related to the selected robot series," for example, click on **HS-E**.

In this example, click on **Owner's Manuals**.

- (3) Type a single letter to choose the part of the index(es) you want to view. In this example, type "w."

It is also possible to search within the index(es) you want to view. For example, within the "w" part of the index(es), it is possible to further define your search to view items which also include "command" by inputting "w" and "command" separated by a space. In this example, the page containing "WAIT Command" will be displayed.

- (4) Click on the **Search** button.

In this example, all hit words starting with "w" in the index(es) selected will be displayed, followed by titles, pages, and file names that contain those hit words.

If there are so many hit words that do not fit inside the current search window, click on the separator bar. The search window will be enlarged to its maximum size. (You may drag the separator bar to adjust the search window to the desired size.)

Scroll bar

Clicking the separator bar again will return the enlarged window to its previous size.

You may also scroll through all hit words with the vertical scroll bar.

- (5) Select the item you want to view and click on the **Go** button or double-click on the highlighted line itself.

The page containing the word you want to view, which was searched from the index(es), is opened.

# Addition of error code retrieval function

Click **Error Code**.

Click **Error Code Search**.

Select the one desired to be retrieved.

Input he error No. and click OK.

The contents of the corresponding error code is displayed.
